SUMMARY

Full Stack Developer building scalable, secure, high-performing web applications across MERN and Next.js/PostgreSQL stacks. ISC2 Certified in Cybersecurity with a strong focus on code quality and cross-functional collaboration.

EDUCATION

College of Engineering Roorkee (COER)
Bachelor of Technology in Computer Science Engineering

Haridwar, Uttarakhand
2022 – 2026

EXPERIENCE

Zeploit Technologies Pvt. Ltd.

Oct 2025 – Dec 2025

React Developer Intern

Remote

- Collaborated with cross-functional team members in an Agile environment to break down features and deliver frontend solutions using React and REST APIs, ensuring alignment with backend architecture and business requirements.
- Debugged and resolved application issues, improving overall performance, reliability, and code quality across the application.
- Integrated backend APIs and collaborated on database-driven modules to support core business workflows, coordinating closely with backend developers.

PROJECTS

AI Career Coach | *Next.js, Gemini AI, PostgreSQL, Prisma ORM*

2025

- Designed and implemented a scalable, high-performing AI career platform with resume generation, interview preparation, and personalized insights, applying secure coding practices across the API layer.
- Designed normalized PostgreSQL schemas using Prisma ORM to reliably manage user profiles, resumes, career insights, and application data at scale.
- Built resilient API routes, authentication flows, and reusable UI components using Next.js and Tailwind CSS, following best practices for maintainability and code review readiness.

CartNow | *MERN Stack, JWT Authentication*

2026

- Built a full-stack e-commerce application with secure product management, shopping cart, and order processing workflows, emphasizing code quality and reliability.
- Implemented JWT-based authentication, protected routes, and role-based access control to enforce security and prevent unauthorized access – directly applying cybersecurity best practices.
- Integrated Razorpay payments and Cloudinary image uploads while developing scalable, resilient RESTful APIs and responsive interfaces.

AI Code Reviewer | *React, Node.js, Express.js, Gemini API*

2026

- Built an AI-powered code review platform using Gemini API with custom prompts to analyze code quality, security, and performance, supporting best development practices.
- Implemented syntax-highlighted code editing and markdown rendering to improve developer productivity and usability.

TECHNICAL SKILLS

Frontend & Styling: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Shadcn UI

React Ecosystem: React Router, Axios, Fetch API, Context API, Redux

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture, Microservices Design Principles

Databases & ORM: MongoDB, MongoDB Atlas, PostgreSQL, Prisma ORM

Security & Quality: Secure Coding Practices, Code Reviews, Role-Based Access Control, API Security

AI & Developer Tools: Gemini API, Prompt Engineering, AI Application Development, Cloudinary, Razorpay

Tools & Deployment: Git, GitHub, Postman, Vercel

CERTIFICATIONS

ISC2 – Certified in Cybersecurity (CC) – Issued Aug 2025 (Active) – directly supports code security and quality requirements

IBM Cybersecurity Fundamentals – Active
